

GATIKRISHNA DASH

Senior Product Leader | AI, Automation & Strategy | Product Vision & Roadmap

+91 8939664483 gati4dash@gmail.com LinkedIn: [Gati Dash](#) Hyderabad, India

SUMMARY

Senior Product professional with 15+ years of experience in AI-driven platform systems and product leadership, expert in workflow automation and AI-native operating models. My key achievements include reducing manual intervention by 60% and improving processing turnaround time by 50% at PayPal, as well as delivering a unified Regulatory Reporting Platform that increased operational efficiency by over 60%. Seeking a product leadership role where I bring my platform strategy and product scaling skills to support your mission of delivering measurable value to customers and the business.

CORE COMPETENCIES

AI & Intelligent Automation

GenAI Strategy & Implementation (Claude, LLMs, Human-in-the-Loop) | AI-Native Operating Models | Workflow Automation & Orchestration | Agentic Systems Thinking

Product & Platform Leadership

Enterprise Platform Strategy | Regulatory & Governance Platforms | Global Product Integrations (M&A) | 0→1 & 1→N Product Scaling

Technical & Data Foundations

Data Engineering Hands On | SQL / Big Query | API Specifications and Integrations | GCP (Cloud)

Leadership & Influence

Cross-Functional Executive Alignment | Strategic Road mapping | Process Transformation & Change Management

EXPERIENCE

Lead Product Manager

10/2023 - Present

[PayPal](#)

- Developed AI-driven platform automating workflow and decisions. Integrated systems in 5 jurisdictions for reliable, auditable, scalable execution.
- Implemented reliability patterns for workflows: validation layers, retry mechanisms, and human-in-the-loop overrides for fault-tolerance.
- Built reusable platform primitives including LLM agents, MCP-based connectors, and orchestration layers with structured outputs, enabling deterministic execution of AI-driven workflows against enterprise systems.
- Reduced manual intervention by 60% and improved processing turnaround time by 50% for high-volume workflows.
- Drove adoption of AI-powered decision pipelines across teams, transitioning from manual execution to system-driven operations.
- Led experimentation in regulated environments, balancing innovation with audit readiness; submitted a patent application on agentic AI systems.

Lead Product Manager

04/2022 - 10/2023

[PayPal](#)

- Defined and led the strategic vision for launching a unified Regulatory Reporting Platform under a broader common-platform transformation initiative, enabling scalable compliance across global markets.
- Drove enterprise-wide onboarding of 60+ regulatory reports across three markets within three months, delivering over 60% operational efficiency gains and reducing reporting turnaround time by 80%.
- Led post-Brexit regulatory efforts, tracking vulnerabilities to align with UK mandates and VC policies.
- Scaled and mentored product and business systems teams during a high-growth phase, expanding team capacity by 80% while maintaining execution excellence.

Sr Product Manager

04/2020 - 03/2022

[PayPal](#)

- Launched AML and SAR reporting capabilities through the regulatory platform, enabling PayPal to secure approval for online payment processing expansion in China
- Delivered crypto transfer reporting infrastructure in the U.S., operationalizing AML/CTF controls and regulatory metric reporting while unlocking a \$4B revenue opportunity
- Served as a core member of the Business Advisory Group, influencing monthly and quarterly strategic forums and shaping Go/No-Go decisions for new product launches and feature rollouts

Sr Product Manager

10/2019 - 03/2020

[PayPal](#)

- Ensured GDPR compliance for key international markets, protecting **over \$10B+ in revenue exposure** by leading the Privacy platform strategy.
- Collaborated with policy and cross-functional product teams to enable monitoring and tracking of 100+ data privacy rules.

EXPERIENCE

Product Manager

03/2018 - 09/2019

PayPal

- Built the Customer Risk Rating (CRR) model and ramped globally, evaluating and assigning risk scores to every PayPal user within 24 hours of onboarding and auto-triggering required policy enforcements
- Led data and product solutions in Global Data Governance and Regulatory domain covering TAX solutions, Fraud Detection, Profile Scanning, CIP/KYC, and cross-border AML reporting

Sr Staff BI Analyst

08/2014 - 03/2018

Altimetrik (PayPal)

- Collaborated with PayPal product managers and contributed to data visualization, product planning, and feature enhancements
- Collaborated with SMEs from PayPal acquisitions (Xoom, Venmo) to analyse datasets and leverage them for scanning and regulatory reporting
- Partnered with the Product team for PayPal India launch to measure and track key metrics and publish them for product decision making
- Instrumental in 30% OpEx saving by reducing manual touchpoints through platform automation

Data Engineer

01/2012 - 12/2014

Cognizant

- As a data engineering lead, built and enhanced Global Banking Information Database for Barclays Bank using Teradata and Informatica.
- Improved data governance and lineage by 30%, by building multiple interactive Tableau dashboards and automated notifications.
- Led development of Barclays Bank's Global Banking Information Database managing data for over multi million transactions using Teradata and Informatica.
- Increased data governance and lineage accuracy by 30% through creation of 5 interactive Tableau dashboards and automated alerts.

ETL Developer

01/2009 - 12/2012

Wipro

- Developed and maintained 100+ ETL pipelines using Teradata and Datastage, collaborating with business users, architects, and BSA's in an onshore-offshore model.
- Improved data processing efficiency by 30% through enhancing existing ETL pipelines in Teradata and Datastage, working with cross-functional teams at Wipro.
- Optimized Teradata SQL queries, improving runtime by 20% in ETL workflows.
- Created documentation and training materials for ETL processes, improving knowledge transfer.
- Designed and implemented automated data validation processes reducing errors by 20% at Wipro.

EDUCATION

Executive Education-Strategic Digital Leadership Programme

10/2025 - 01/2026

Indian School of Business (ISB)

Executive Education-Post Graduate Certificate in Product Management

04/2022 - 06/2023

Kellogg School of Management, Northwestern University

BTech- Computer Science and Engineering

08/2004 - 05/2008

Biju Patnaik University of Technology

TRAINING / COURSES

Become Generative AI Leader - Google Cloud Certification

AI/ML · Google Cloud Platform (GCP) · Vertex AI

Tech-Building RAG Applications at PayPal

RAG fundamentals, Grounding, Cosmos AI

Tech-Getting Started with Agentic AI at PayPal

Cosmos AI, Agentic AI System, MCP

INTERESTS

Technology and Digital Design

Exploring technology advancements in Responsible AI and Blockchain, along with a keen interest in Digital Identity and UX Design.
Building Agentic AI projects in spare time
